-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claim 3 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,635,344. This is a double patenting rejection. Claim 12 contains all limitations of the reference claim 1; the only difference is the preamble "an article of manufacture". However, that phrase is an empty phrase as it does not add any limitation or alter the meaning of a product claim because any synthetic product (in this case "absorbent structure") is an article of manufacture.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-9 are rejected under the judicially created doctrine of double patenting over claims 1, 5, 6, 11, 15 and 16 of U. S. Patent No. 6,635,344 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: an absorbent material comprising a carrier containing woody ring and chaff ring with a moisture below 10%. The preamble "an article of manufacture" is an empty phrase as it does not add any limitation or alter the meaning of a product claim because any synthetic product (in this case "absorbent structure") is an article of manufacture. With regard to claim 2, it would have been obvious to one having ordinary skill in the art that an absorbent material is suitable as a component in all products where absorbing properties are required. Therefore, it would have been obvious to make napkins, diapers, toilet tissues, etc, by utilizing the absorbent material taught by the Patent 6,635,344.

5. Applicant's amendment filed November 19, 2004 adding the limitation of moisture content of the carrier has overcome the art rejection applied against claims 1-9. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of the double patenting rejection set forth above.

*Allowable Subject Matter*

6. Claims 10-18 are allowed in view of the amendment filed November 19, 2004 that adds the limitation of the moisture content of the carrier. In order to keep the moisture level of the carrier under 10% as claimed, the woody ring as well as chaff ring of a corncob must be heat-treated as disclosed in the instant specification. The Peiffer reference is silent as to the moisture content of the carrier and does not teach or suggest any heat treatment for the carrier.
